Patchwork Solutions easy fit kit for Raven Bredal Spreader conversion

Patchwork have developed an easy fit kit of parts to allow existing wheel driven KRM Spreaders to be converted to an easily adjusted Automatic control system for both fixed rate and GPS commanded variable rate spreading. The Kit includes a Raven controller, Hydraulic drive motor, all cables and hydraulic hoses and a speed sensor. Fitting involves replacing the wheel drive assembly with the replacement unit. Price for the system ranges from £3,900 with 660 controller magnetic speed sensor, up to £4,900 for 4600 controller, GPS speed sensor and datalogging. Fitting can be arranged. Price without motor and Bracket where these are already fitted is reduced by £1000.

The system will also be available as an option on new and existing Bredal Spreaders from KRM. This system provides a cost effective means of providing Variable rate spreading technology with existing equipment.

Contact KRM and Patchwork for more details of systems for Variable Rate spreading
Patchwork BBVRT will supply Variable rate plans from most sources to the Raven controller from £1500 inclusive of cables. .
