Patchwork solutions easy fit kit for Raven Sidekick Chemical Injection.

- Patchwork presents the Raven Sidekick injection system, modified to allow easy fitting to existing sprayers
- The first example of this system is an easy to fit addition to the Househam range.
- Fits the existing spraying system controller to provide chemical injection at minimum cost and disruption.

The unit fits the standard Househam backframe and slots in provided mountings Cable connections are provided to connect to any standard controller Standard tanksize is 45 litres. Control console provided in cab

The benefits of Direct Injection

No need to wash out tank when using incompatible chemicals – Spray Roundup on set-aside then no need to flush tank

Ability to vary chemical rate without affecting droplet size

Sidekick can hookup to external controller such as Patchwork BlackBox too allow “patch “ spraying or variable rate of growth regulators and fungicides.

Exclude insecticides from filed boundaries without separate tank mix

Cost of Sidekick system approx £3000- £4000 depending on model . Fitting service available
